

Meet College Programs Manager Christine Benoit

College Programs
Manager Christine Benoit

My professional career spans four decades in general dentistry, in a coastal town in the northeastern United States. In 2016, I completed my sixth year as International Councilor. My emphasis was to shepherd in the [ICD Get Smart About Antibiotics](#) project and the [Dental Safety Program](#). Also, the Membership Committee that I chaired developed strategies and actions to increase and retain Fellows worldwide.

For outside interests, I very much enjoy hiking, gardening, playing tennis, and spending time with my family. Each year, garden clubs visit my family's garden to view

spectacular displays of my husband Bruce's plantings.

When my term as Councilor ended, I was delighted to be asked to serve the College as Programs Manager. I continue to assist the ICD Get Smart About Antibiotics program, the Dental Safety Program and review speaking opportunities for ICD-sponsored educational programs.

My vision for 2017 is to further the global mission of the ICD, and promote the educational programs the College embarks in.

Dr. Christine Benoit

College Programs Manager
